

## AT312 EQ

### ASSET TRACKING DEVICE

The AT312 EQ is part of the Vehiclepath tracking line. While the device requires a power source, it does contain an internal back up battery.

This unit has been specifically designed and engineered to update on a daily basis or manual locate. It will automatically generate unauthorized movement alerts if an automatically generated perimeter fence is broken. The device will continue to provide an unauthorized movement alert every 30 minutes until stationary. Once stationary, the device creates its own circular perimeter fence, one mile in diameter.

The AT312 EQ can be installed on any asset that contains a 12 or 24 volt power source. The device is built to withstand harsh environments and can function in up to 1 meter of water. Its cellular and GPS antennas are completely integrated. The AT312 EQ is supported by our optional 2 and 3-year extended manufacturer's warranty.

#### Target Markets:

- Construction equipment rentals

#### Product Differentiators:

- Continuous tracking device
- Internal battery back up
- Low monthly rate

- Low power consumption (1mA in sleep mode)
- Monitors engine hours
- Voltage monitoring and low-battery notification
- Over-the-air firmware upgrade capability
- Unauthorized Movement Alert
- Disconnect Alerts
- GSM Quad-band (800/900/1800/1900 MHz)
