

TRAINING EXPECTATIONS

10600 W. Mitchell Street, West Allis, WI 53214 888-415-1896 (O) 262-308-4471 (C) 414-255-3795 (F)

TRAINING

Just to clarify 'Training' –

We consider training to be more a time for you and/or your designated employee(s) to get together and go over the User Interface thoroughly.

We can help you decide which reports best suit your business and the frequency you wish to see them. You will learn about alerts and recipients as well as how to set up Landmarks. This is a very feature rich system and it is our goal to help you get the most from its use.

We have found that our on line training videos and the 24/7 training URL <https://attendee.gotowebinar.com/register/4028576907309695747> are generally all that is needed to get you up to speed. However we are here to provide individual assistance if needed. We understand that if we do meet (via the web), if there are interruptions by a phone call, an employee, or whatever we can pause and let you handle business.

It is all very laid back. We know you are busy folks so we are expecting there are interruptions. It can also be handled in more than one session. In a word, actually two,No Worries.

GPS Track USA provides real time GPS vehicle tracking solutions optimized for service-based organizations. For more information **GPS Track USA**, visit www.gpstrackusa.com or contact Van Gusdorff at van@gpstrackusa.com.
